TECHNICAL INFORMATION SHEET FRESHEN-UP

Code No. 08153

Freshen-Up is an effective, safe and environmentally friendly odour controller. Freshen-Up contains sophisticated, non-resoiling cleaning capabilities designed specifically for carpet and upholstery stain removal.

The pH of the concentrate under typical analysis is 8.6.

DIRECTIONS

Always wear appropriate protective clothing and read product label and Safety Data Sheet before use.

It is important to test all textile surfaces for colour fastness before carrying out any cleaning procedure. Always check that the chosen cleaning technique is compatible with the type of carpet to be cleaned.

1. APPLICATION

Freshen-Up is designed to provide optimum odour reduction and "after cleaning" benefits in multiple applications:

- Carpet Stain and Odour Eliminator
- Toilet and Washroom Areas
- Refuse Collection Areas
- Bathrooms
- Pet Areas
- Garage and Basement
- Fitness Facilities
- Laundry Rooms

1.1. Removal of Malodour:

Remove any debris using a paper towel or cloth. Spray the product evenly over odour and allow to work. DO NOT spray into the air as it will have no effect.

1.2. Stain Removal:

Firstly undertake a colour fastness test. Remove or scrape away any solid matter. Spray Freshen-Up directly onto stain and allow 1 hour contact time keeping the product wet, then agitate with a damp sponge or cloth. On hard wearing surfaces, or for stubborn marks, a soft hand brush may be tried. During agitation always brush into the centre of the mark to reduce the size of the stain and not spread it. Repeat application where stains are persistent, then when the task is completed and the area has dried, vacuum thoroughly.

Freshen-Up is the result of intensive efforts to engineer a household and industrial odour controller and cleaner that goes a step beyond other products available.

TRAINING ACADEMY

The Technical Staff in the Training Academy can ensure that the correct equipment and methods are used and our consultants can provide on-site training and advice. Standard two day training courses are held regularly in Cheltenham, and tailor-made courses can be arranged if necessary.

HEALTH AND SAFETY INFORMATION

Appropriate Health and Safety Information is detailed on the individual product label or relevant material safety data sheet.

Urgent professional advice regarding First Aid may be obtained by contacting the nearest regional centre of the National Poisons Information / Service (NPIS), where all products are registered.

These pictogrammes form part of the BICS Certified Premiere Training System.
Full details are available on request.

A Premiere small, select group of specialised hygiene products for use in areas, which require the highest levels of hygiene control. This group includes products, which have been specially formulated for "odour control" as well as a premium, multi-functional biocide, which combines highly efficient cleaning with a wide spectrum of virucidal, bactericidal and fungicidal activity. For details of Premiere's range of general-purpose disinfectants with conventional fragrances (e.g. pine, lemon etc.) refer to the relevant Technical Information Sheets

First class results can only be achieved using the correct equipment and products within the framework of a regular cleaning programme. This product group forms a vital and integral part of Premiere's comprehensive range of environmentally friendly chemicals. Users in all sectors of the cleaning industry may select with confidence those products with precisely the right characteristics for the tasks they have to undertake.

In case of difficulty in making the correct choice or for further information on Premiere's cleaning and maintenance chemicals, equipment and machines, contact the local Premiere Representative or Head Office in Cheltenham.

FRESHEN-UP

Freshen-Up is a spray microbial odour controller and stain digester. It is simple, safe and effective on most hard surfaces and is particularly suitable for use on carpets and upholstery. Freshen-Up combines a novel chemical formulation for immediate odour control with long lasting, deep cleaning benefits of biotechnology. Freshen-Up contains a high impact apple fragrance which immediately deodorises unwanted odours.

Freshen-Up kills odours from tobacco, urine and vomit etc as well as removing and digesting stains left by urine, vomit, red wine and food stuffs.

Up to 1 hour + the microbial action kicks in utilising safe Bacillus microbes. This digests the organics converting them to ${\rm CO_2}$ and water removing the source of odour.

PACKAGING

6 x 750 mls Premiere Code No. 08153

No liability is accepted for any loss or damage arising directly or indirectly from the use of the Company's products, or from the use of the implied of freedom from patent rights. Prospective users should, therefore, satisfy themselves by appropriate trials that the product to be used is suitable for the intended use and that such will not infringe any patent.

We continue to reserve the right to alter designs of any product as part of a further process of improvement and products supplied may therefore vary from those detailed on this Technical Information Sheet.

QUALITY APPROVALS

BS EN ISO 9001

All products manufactured to Premiere formulations are processed conforming to appropriate standards within the Quality System described in the Quality Manual and comply with the requirements of ISO 9001.
