

TECHNICAL INFORMATION SHEET WINDOW SPIRIT

Code No. 04008

These pictograms form part of the **BICS Certified Premiere Training System**. Full details are available on request.

INTRODUCTION

The comprehensive Premiere range of environmentally friendly products to meet most housekeeping needs in hotels, halls of residence, nursing homes and other residential premises. These products are also suitable for use in commercial premises for the routine care and maintenance of furniture, washable hard surfaces, internal glazing (including mirrors) and fixtures and fittings in offices as well as in toilets, washrooms or bathroom areas. None of these products are suitable for use on soft furnishings.

First class results can only be achieved using the correct equipment and products within the framework of a regular cleaning programme. The range of products enables the user to select those with precisely the right characteristics for the various tasks within any housekeeping department.

In the case of difficulty in making the correct choice or for further information on Premiere's cleaning systems and extensive range of cleaning and maintenance chemicals, equipment and machines, contact the local Premiere representative or Head Office in Cheltenham.

WINDOW SPIRIT

A non abrasive cleaner for glass, laminates, metals and ceramics which evaporates leaving a clean, smear free, shiny surface. This pure formula has the latest innovative technology employing deionised water, as hard water salts can produce water marking on drying if sprayed and not buffed. It has no synthetic fragrances, no acetic acid vinegar and no ammonia just a pure formula for a smear free finish. New **Window Spirit** passes the "Sunshine Test". By utilising a highly volatile alcohol (low hazard at concentrations employed), rapid evaporation and drying is achieved which is a pre-requisite of window cleaning. New **Window Spirit** is a pure formula without any technical extras in order to optimise the formulation, whilst completely minimising the potential for window smear.

The pH of **Window Spirit** under typical analysis is 6.0.

DIRECTIONS

Always wear the appropriate protective clothing and read product label and Safety Data Sheet before use.

1. CLEANING TECHNIQUES

Spray sparingly onto the surface from a distance of approximately 15cm (6 inches). Spray a small area at a time and spread the product over the surface with a clean, lint free cloth. Continue buffing with a dry section of the cloth to achieve a clean, shiny, smear free finish. On small items, or to avoid overspray onto adjacent surfaces, spray the product lightly onto the duster and apply as normal. Dispose of empty containers after use, but retain trigger spray for use on other trigger packs. Do not use on any food preparation surfaces or electrical equipment.

COVERAGE

An aid to budgeting and operational planning.

For each product supplied in a trigger pack (excluding all trigger spray air fresheners) 2 or 3 pumps of the trigger should be sufficient to clean and/or polish approximately 1 square metre of surface area. A full 500ml trigger pack should enable a total surface area of 250-300 square metres to be treated.

PRODUCT SELECTION

Use the following to determine whether **Window Spirit** is recommended for the various typical surfaces or articles indicated. Where doubt exists seek technical advice or conduct a suitable trial.

GLASS	LAMINATES	METALS	CERAMICS
Windows Mirrors Table Tops Picture Frames Screens	Work Tops Furniture Bedroom Units Bathroom Units	Stainless Steel Chrome Aluminium	Tiles Cabinets

TRAINING ACADEMY

The technical staff in the Training Academy can ensure that the correct equipment and methods are used and our Consultants can provide on-site training and advice. Standard two day training courses are held regularly in Cheltenham, and tailor made courses can be arranged if necessary.

HEALTH AND SAFETY INFORMATION

Appropriate Health and Safety information is detailed on the individual product label or relevant material safety data sheet.

Urgent professional advice regarding First Aid may be obtained by contacting the nearest regional centre of the National Poisons Information Service (NPIS), where all products are registered.

PACKAGING

6x 750ml Trigger Pack Premiere Code No. 04008

No liability is accepted for any loss or damage arising directly or indirectly from the use of the Company's products, or from the use of the information given in its publications; neither is any warranty given or implied of freedom from patent rights. Prospective users should, therefore, satisfy themselves by appropriate trials that the product to be used is suitable for the intended use and that such use will not infringe any patent.

We continue to reserve the right to alter designs of any products as part of a further process of improvement and products supplied may therefore vary from those detailed on this Technical Information Sheet.

QUALITY APPROVALS

BS EN ISO 9001
All products manufactured to Premiere formulations are processed conforming to appropriate standards within the Quality System described in the Quality Manual and comply with the requirements of ISO 9001.

Cert No.
0947290
