

TECHNICAL INFORMATION SHEET

FRESHALOO®

Code No. 11013 & 11010

INTRODUCTION

The Premiere range of high quality toilet cleaning products has been formulated for the routine maintenance and periodic deep cleaning of toilets and urinals.

The use of the appropriate toilet cleaning product and equipment will clean, descale, kill germs and deodorise, enhancing the appearance and considerably improving standards of hygiene.

First class results can only be achieved using the correct products, machines and equipment within the framework of a regular cleaning programme. This range makes it possible to select a toilet cleaning product with precisely the right characteristics for the task and equipment available.

In case of difficulty in making the correct choice or for further information on Premiere's cleaning and maintenance chemicals, equipment and machines, contact the local Premiere Representative or the Head Office in Cheltenham.

FRESHALOO®

A mild descaler and deodorant for the daily maintenance of toilets and urinals. Suitable for use on all toilets and urinals manufactured in chrome, stainless steel, ceramic and vitreous china.

Freshaloo contains a powerful detergent to remove dirt and assist penetration, together with a sulphamic acid content to remove scale and prevent further scale formation. Freshaloo also contains a contact adhesive thickener to ensure adequate time for the chemical to attack scale on the vertical surfaces above water level. In order to protect ferrous metals and copper based alloys, an efficient inhibitor is employed.

The pH of the concentrate under typical analysis is 1.5.

DIRECTIONS

Always wear the appropriate protective clothing and read product label and Safety Data Sheet before use.

NOTE: Do not mix Freshaloo with bleach based toilet cleaners.

Not suitable for baths or enamel surfaces.

1. CLEANING TECHNIQUES

1.1 Toilets: Expel as much water as possible from the toilet bowl by pushing it over the S bend using a stiff toilet brush. Apply neat Freshaloo on to the surface to be cleaned and under the rim of the toilet bowl. Allow time to penetrate (7 - 8 minutes contact time), agitate with toilet brush and then flush away rinsing the brush in the fresh water. Always wipe off any splashes made and wipe out toilet brush holder before replacing brush.

1.2 Urinals: Switch off automatic flushing system, apply Freshaloo on to the surface to be cleaned and allow 7-8 minutes contact time. Agitate with toilet brush or abrasive pad. Rinse well any metals fittings, switch on automatic flushing system and leave urinals to flush automatically.

NOTE: For periodic treatment of toilets or urinals to remove severe staining or heavy build up of scale, either T.D.30 or T.D.10 are recommended.

TRAINING ACADEMY

The technical staff in the Training Academy can ensure that the correct equipment and methods are used and our Consultants can provide on-site training and advice. Standard two day training courses are held regularly in Cheltenham, and tailor made courses can be arranged if necessary.

HEALTH AND SAFETY INFORMATION

Appropriate Health and Safety information is detailed on the individual product label or relevant material safety data sheet.

Urgent professional advice regarding First Aid may be obtained by contacting the nearest regional centre of the National Poisons Information Service (NPIS), where all products are registered.

PACKAGING

2 x 5 litre Polythene Containers
12 x 750mls

Premiere Code No. 11013
Premiere Code No. 11010

No liability is accepted for any loss or damage arising directly or indirectly from the use of the Company's products, or from the use of the information given in its publications; neither is any warrant given or implied of freedom from patent rights. Prospective users should, therefore, satisfy themselves by appropriate trials that the product to be used is suitable for the intended use and that such use will not infringe any patent.

We continue to reserve the right to alter designs of any products as part of a further process of improvement and products supplied may therefore vary from those detailed on this Technical Information Sheet.

QUALITY APPROVALS

BS EN ISO 9001
All products manufactured to Premiere formulations are processed conforming to appropriate standards within the Quality System described in the Quality Manual and comply with the requirements of ISO 9001.

Cert No.
0947290
